Mental Health Policy

Document title	Mental Health Policy
Author/originator	C Waterhouse
Date of Approval	3 rd July 2019
Approving Committee	MAT Board
Version	2.1
Policy review date	September 2020

1. Policy statement

As a Trust, we aim to promote positive mental health for every member of our staff and student body. We pursue this aim using both universal, whole school approaches, and for vulnerable students we use specialised, targeted approaches.

In addition to promoting positive mental health, we aim to recognise and respond to mental ill health. In an average classroom, three children will be suffering from a diagnosable mental health issue (Young Minds, 2017). By developing and implementing practical, relevant and effective mental health policies and procedures we can promote a safe and stable environment for students affected both directly, and indirectly by mental ill health.

“Mental health is a state of well-being in which every individual realises his or her own potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to her or his community.” (World Health Organization, August 2014)

This document describes the Trust’s approach to promoting positive mental health and wellbeing. This policy is intended as guidance for all staff, including non-teaching staff and governors.

This policy should be read in conjunction with our medical policy in cases where a student’s mental health overlaps with, or is linked to, a medical issue and our Special Educational Needs and Disabilities (SEND) policy where a student has an identified special educational need.

2. The policy aims to:

- promote positive mental health in all staff and students;
- increase understanding and awareness of common mental health issues;
- alert staff to early warning signs of mental ill health;
- provide support to staff working with young people with mental health issues;
- provide support to students suffering mental ill health and their peers and parents/carers.

3. Lead members of staff

Whilst all staff have a responsibility to promote the mental health of students, staff with a specific, relevant remit include:

- Rachael Mann – Designated Safeguarding Lead (DSL);
- Simon Clay - Special Educational Needs Co-ordinator (SENCo);
- Megan Grocock, Jonathan Haye, Kerry Hornby, Kirsten Martin - Learning Mentors/TAs
- Stuart Simpson-Smith & Rachael Derbyshire- First Aider(s).

Any member of staff who is concerned about the mental health or wellbeing of a student should speak to the DSL and SENCo in the first instance. If there is a fear that the student is in danger of immediate harm then the normal safeguarding procedures should be followed. If the student presents a medical emergency then the normal procedures for medical emergencies should be followed, including alerting the first aid staff and contacting the emergency services if necessary.

Where a referral to the Child and Adolescent Mental Health Service (CAMHS) is appropriate, this will be led and managed by the SENCo or DSL in liaison with parents and where appropriate the school nurse or their GP.

4. Risk assessments

It is helpful to draw up a risk assessment for students causing concern or who receive a diagnosis pertaining to their mental health. This should be drawn up with involvement from the student, the parents/carers and relevant health professionals. This will include:

- details of the student's behaviours and/or condition;
- de-escalation strategies and/or special requirements and precautions;
- medication and any side effects;
- what to do and who to contact if concerns arise or in an emergency.

A template is included in Appendix 1.

5. Teaching about mental health

The skills, knowledge and understanding needed by our students to keep themselves and others physically and mentally healthy and safe are included as part of our developmental Life Skills/PSHE curriculum.

The specific content of lessons will be determined by the specific needs of the cohort being taught, but there will always be an emphasis on enabling students to develop the skills, knowledge, understanding, language and confidence to seek help, as needed, for themselves or others.

We will follow the PSHE Association Guidance, [Teacher guidance: teaching about mental health and emotional wellbeing](#), to ensure that we teach about mental health and emotional wellbeing issues in a safe and sensitive manner which helps rather than harms.

6. Signposting

We will ensure that staff, students and parents are aware of relevant sources of support within school and in the local community. Further information and sources of support for common mental health issues are outlined in Appendix 2.

We will advertise drop-ins with the school nurse and any other relevant sources of support and will regularly highlight sources of support to students within relevant parts of the curriculum. Whenever we highlight sources of support, we will increase the chance of student help-seeking by ensuring students understand:

- what help is available;
- who it is aimed at;
- how to access it;
- why to access it;
- what is likely to happen next.

7. Warning signs

School staff may become aware of warning signs which indicate a student is experiencing mental health or emotional wellbeing issues. These warning signs should **always** be taken seriously and staff observing any of these warning signs should communicate their concerns with the SENCo and DSL.

Possible warning signs include:

- physical signs of harm that are repeated or appear non-accidental;
- changes in eating or sleeping habits;
- increased isolation from friends or family, becoming socially withdrawn;
- changes in activity and mood;
- lowering of academic achievement;
- talking or joking about self-harm or suicide;
- abusing drugs or alcohol;
- expressing feelings of failure, uselessness or loss of hope;
- inappropriate clothing, e.g. long sleeves in warm weather;
- secretive behaviour;
- skipping PE or getting changed secretly;
- repeated physical pain or nausea with no evident cause;
- an increase in lateness or absenteeism.

8. Suicide Prevention

The Academy is aware that suicide is the leading cause of death in young people and that school can play a vital role in helping to prevent young suicide. We want to make sure that children and young people in our school are as suicide-safe as possible and that our governors, parents and carers, teaching staff, support staff and pupils themselves are aware of our commitment to be a suicide-safer school.

The Academy acknowledges that thoughts of suicide are common among young people. We understand that there are a number of contributory factors surrounding any suicide and that the reasons are often complex and individual. We recognise that the stigma surrounding suicide and mental illness can be a barrier to seeking help and can also be a barrier to offering help. Tudor Grange Academy Trust is committed to tackling this stigma and we will promote open, sensitive talk in our language and in our working relationships. As a school community, we recognise that pupils may seek out someone whom they trust with their concerns and worries and we will support any pupil who may have thoughts of suicide, in partnership with family, caregivers and other professionals where this may enhance the safety of the pupil.

We know that a child or young person who is suicidal may find it very difficult to talk about their feelings and we will equip key members of staff with training to identify when a pupil may be struggling and to help keep our pupils safe. We will provide our pupils with opportunities to speak openly about their worries with people who are ready, willing and able to support them. This may lead to further support and help where it is needed.

9. Managing disclosures and confidentiality

A student may choose to disclose concerns about themselves or a friend to any member of staff so all staff need to know how to respond appropriately to such a disclosure. Refer to the Trust Safeguarding Policy for further detail on managing disclosures.

If a student chooses to disclose concerns about their own mental health or that of a friend to a member of staff, that member of staff's response should always be calm, supportive and non-judgmental.

Staff should listen rather than advise and the first thoughts should be of the student's emotional and physical safety rather than of exploring 'why?' For more information about how to handle mental health disclosures sensitively see Appendix 3.

We will be honest with regards to the issue of confidentiality. If it is necessary for us to pass on our concerns about a student then we will discuss with the student:

- who we are going to talk to;
- what we are going to tell them;
- why we need to tell them.

All disclosures should be recorded in writing and held on the student's confidential file in line with safeguarding procedures. This information should be shared with the DSL who will store the record appropriately and offer support and advice about next steps.

Staff should never share information about a student without first telling them. Ideally staff would receive their consent, though there are certain situations when information must always be shared with another member of staff and/or a parent/carer. This includes when a student is under the age of 16 and is in danger of harm. If a student gives the Academy reason to believe that there may be underlying child protection issues, parents should not be informed, but the DSL must be informed immediately.

It is always advisable to share any type of disclosure with a colleague, usually the SENCo or DSL, as this helps to safeguard staff's own emotional wellbeing as individuals are no longer solely responsible for the student. It ensures continuity of care in their absence and it provides an extra source of ideas and support.

10. Working with parents

Where it is deemed appropriate to inform parents, we will be sensitive in our approach. It can be shocking and upsetting for parents to learn of their child's issues and many may respond with anger, fear or upset during the first conversation. We should be accepting of this (within reason) and give the parents time to reflect.

We will highlight any further sources of information and give leaflets to take away where possible, as parents can find it hard to take much in whilst coming to terms with the news being shared. Sharing sources of further support aimed specifically at parents can also be helpful too, e.g. parent helplines and forums.

We will always provide a clear means of contacting school with further questions. Each meeting will finish with agreed next steps and a record of the meeting will be kept on the child's confidential record.

Parents are often very welcoming of support and information from school about supporting their children's emotional and mental health. In order to support parents we will:

- highlight sources of information and support about relevant mental health issues;
- ensure that all parents are aware of who to talk to and how to get relevant information if they have concerns about their child;

- make our mental health policy easily accessible to parents;
- share ideas about how parents can support positive mental health in their children;
- keep parents informed about the mental health topics their children are learning about at school and share ideas for extending and exploring this learning at home.

11. Supporting peers

When a student is suffering from mental health issues it can be a difficult time for their friends. Friends often want to support but do not know how. In the case of self-harm or eating disorders, it is possible that friends may learn unhealthy coping mechanisms from each other. In order to keep peers safe, we will consider on a case by case basis which friends may need additional support. Support will be provided either in one to one or group settings and will be guided by conversations with the student and their parents with whom we will discuss:

- what it is helpful for friends to know and what they should not be told;
- how friends can best support;
- things friends should avoid doing or saying which may inadvertently cause upset;
- warning signs that their friend may need further adult help.

Additionally, we will want to highlight with peers:

- where and how to access support for themselves;
- safe sources of further information about their friend's condition;
- healthy ways of coping with the difficult emotions they may be feeling.

12. Training

As a minimum, all staff will receive training about recognising and responding to mental health issues as part of their regular child protection training in order to enable them to keep students safe.

Training opportunities for staff who require more in-depth knowledge will be considered as part of our performance management process and additional CPD will be supported throughout the year where it becomes appropriate due to developing situations with one or more students.

The Minded learning portal (www.minded.org.uk) provides free online training suitable for staff wishing to know more about a specific issue.

Risk Assessment

Name of person completing the risk assessment	Date					
What are the hazards?	Who might be harmed and how?	What control measures are already in place? Are they sufficient?	What additional control measures are needed?	Action by who?	Action by when?	Completed / Review Date and comments

Further information and sources of support about common mental health issues

Prevalence of Mental Health and Emotional Wellbeing Issues¹

- 1 in 10 children and young people aged 5 - 16 suffer from a diagnosable mental health disorder - that is around three children in every class;
- between 1 in every 12 and 1 in 15 children and young people deliberately self-harm;
- there has been a big increase in the number of young people being admitted to hospital because of self-harm. Over the last ten years this figure has increased by 68%;
- more than half of all adults with mental health problems were diagnosed in childhood. Less than half were treated appropriately at the time;
- nearly 80,000 children and young people suffer from severe depression;
- the number of young people aged 15-16 with depression nearly doubled between the 1980s and the 2000s;
- over 8,000 children aged under 10 years old suffer from severe depression;
- 3.3% or about 290,000 children and young people have an anxiety disorder;
- 72% of children in care have behavioural or emotional problems - these are some of the most vulnerable people in our society.

Below we have signposted information and guidance about the issues most commonly seen in school-aged children. The links will take you through to the most relevant page of the listed website. Some pages are aimed primarily at parents but may also be useful for school staff.

Support on all of these issues can be accessed via Young Minds (www.youngminds.org.uk), Mind (www.mind.org.uk) and, for e-learning opportunities, Minded (www.minded.org.uk).

Self-harm

Self-harm describes any behaviour where a young person causes harm to themselves in order to cope with thoughts, feelings or experiences they are not able to manage in any other way. It most frequently takes the form of cutting, burning or non-lethal overdoses in adolescents, while younger children and young people with special needs are more likely to pick or scratch at wounds, pull out their hair or bang or bruise themselves.

Depression

Ups and downs are a normal part of life for all of us, but for someone who is suffering from depression these ups and downs may be more extreme. Feelings of failure, hopelessness, numbness or sadness may invade their day-to-day life over an extended period of weeks or months, and have a significant impact on their behaviour and ability and motivation to engage in day-to-day activities.

Anxiety, panic attacks and phobias

Anxiety can take many forms in children and young people, and it is something that each of us experiences at low levels as part of normal life. When thoughts of anxiety, fear or panic are repeatedly present over several weeks or months and/or they are beginning to impact on a young person's ability to access or enjoy day-to-day life, intervention is needed.

Obsessions and compulsions

Obsessions describe intrusive thoughts or feelings that enter our minds which are disturbing or upsetting; compulsions are the behaviours we carry out in order to manage those thoughts or feelings. For example, a young person may be constantly worried that their house will burn down if they don't turn off all switches before leaving the house. They may respond to these thoughts by repeatedly checking switches, perhaps returning home several times to do so. Obsessive compulsive disorder (OCD) can take many forms – it is not just about cleaning and checking.

Suicidal feelings

Young people may experience complicated thoughts and feelings about wanting to end their own lives. Some young people never act on these feelings though they may openly discuss and explore them, while other young people die suddenly from suicide apparently out of the blue.

Eating problems

Food, weight and shape may be used as a way of coping with, or communicating about, difficult thoughts, feelings and behaviours that a young person experiences day to day. Some young people develop eating disorders such as anorexia (where food intake is restricted), binge eating disorder and bulimia nervosa (a cycle of bingeing and purging). Other young people, particularly those of primary or pre-school age, may develop problematic behaviours around food including refusing to eat in certain situations or with certain people. This can be a way of communicating messages the child does not have the words to convey.

Talking to students when they make mental health disclosures

The advice below is from students themselves, in their own words, together with some additional ideas to help you in initial conversations with students when they disclose mental health concerns. This advice should be considered alongside relevant school policies on pastoral care and child protection and discussed with relevant colleagues as appropriate.

Focus on listening

“She listened, and I mean REALLY listened. She didn’t interrupt me or ask me to explain myself or anything, she just let me talk and talk and talk. I had been unsure about talking to anyone but I knew quite quickly that I’d chosen the right person to talk to and that it would be a turning point.”

If a student has come to you, it’s because they trust you and feel a need to share their difficulties with someone. Let them talk. Ask occasional open questions if you need to in order to encourage them to keep exploring their feelings and opening up to you. Just letting them pour out what they’re thinking will make a huge difference and marks a huge first step in recovery. Up until now they may not have admitted even to themselves that there is a problem.

Don’t talk too much

“Sometimes it’s hard to explain what’s going on in my head – it doesn’t make a lot of sense and I’ve kind of gotten used to keeping myself to myself. But just ‘cos I’m struggling to find the right words doesn’t mean you should help me. Just keep quiet, I’ll get there in the end.”

The student should be talking at least three quarters of the time. If that’s not the case then you need to redress the balance. You are here to listen, not to talk. Sometimes the conversation may lapse into silence. Try not to give in to the urge to fill the gap, but rather wait until the student does so. This can often lead to them exploring their feelings more deeply. Of course, you should interject occasionally, perhaps with questions to the student to explore certain topics they’ve touched on more deeply, or to show that you understand and are supportive. Don’t feel an urge to over-analyse the situation or try to offer answers. This all comes later. For now your role is simply one of supportive listener. So make sure you’re listening!

Don’t pretend to understand

“I think that all teachers got taught on some course somewhere to say ‘I understand how that must feel’ the moment you open up. YOU DON’T – don’t even pretend to, it’s not helpful, it’s insulting.”

The concept of a mental health difficulty such as an eating disorder or obsessive compulsive disorder (OCD) can seem completely alien if you’ve never experienced these difficulties first hand. You may find yourself wondering why on earth someone would do these things to themselves, but don’t explore those feelings with the sufferer. Instead listen hard to what they’re saying and encourage them to talk and you’ll slowly start to understand what steps they might be ready to take in order to start making some changes.

Don't be afraid to make eye contact

"She was so disgusted by what I told her that she couldn't bear to look at me."

It's important to try to maintain a natural level of eye contact (even if you have to think very hard about doing so and it doesn't feel natural to you at all). If you make too much eye contact, the student may interpret this as you staring at them. They may think that you are horrified about what they are saying or think they are a 'freak'. On the other hand, if you don't make eye contact at all then a student may interpret this as you being disgusted by them – to the extent that you can't bring yourself to look at them. Making an effort to maintain natural eye contact will convey a very positive message to the student.

Offer support

"I was worried how she'd react, but my Mum just listened then said 'How can I support you?' – no one had asked me that before and it made me realise that she cared. Between us we thought of some really practical things she could do to help me stop self-harming."

Never leave this kind of conversation without agreeing next steps. These will be informed by your conversations with appropriate colleagues and the schools' policies on such issues. Whatever happens, you should have some form of next steps to carry out after the conversation because this will help the student to realise that you're working with them to move things forward.

Acknowledge how hard it is to discuss these issues

"Talking about my bingeing for the first time was the hardest thing I ever did. When I was done talking, my teacher looked me in the eye and said 'That must have been really tough' – he was right, it was, but it meant so much that he realised what a big deal it was for me."

It can take a young person weeks or even months to admit they have a problem to themselves, let alone share that with anyone else. If a student chooses to confide in you, you should feel proud and privileged that they have such a high level of trust in you. Acknowledging both how brave they have been, and how glad you are they chose to speak to you, conveys positive messages of support to the student.

Don't assume that an apparently negative response is actually a negative response

"The anorexic voice in my head was telling me to push help away so I was saying no. But there was a tiny part of me that wanted to get better. I just couldn't say it out loud or else I'd have to punish myself."

Despite the fact that a student has confided in you, and may even have expressed a desire to get on top of their illness, that doesn't mean they'll readily accept help. The illness may ensure they resist any form of help for as long as they possibly can. Don't be offended or upset if your offers of help are met with anger, indifference or insolence, it's the illness talking, not the student.

Never break your promises

"Whatever you say you'll do you have to do or else the trust we've built in you will be smashed to smithereens. And never lie. Just be honest. If you're going

to tell someone just be upfront about it, we can handle that, what we can't handle is having our trust broken."

Above all else, a student wants to know they can trust you. That means if they want you to keep their issues confidential and you can't then you must be honest. Explain that, whilst you can't keep it a secret, you can ensure that it is handled within the school's policy of confidentiality and that only those who need to know about it in order to help will know about the situation. You can also be honest about the fact you don't have all the answers or aren't exactly sure what will happen next. Consider yourself the student's ally rather than their saviour and think about which next steps you can take together, always ensuring you follow relevant policies and consult appropriate colleagues.

[Health behaviour of school age children](#) is an international cross-sectional study that takes place in 43 countries and is concerned with the determinants of young people's health and wellbeing.

What makes a good CAMHS referral?²

If the referral is urgent it should be initiated by phone so that CAMHS can advise of best next steps.

Before making the referral, have a clear outcome in mind, what do you want CAMHS to do? You might be looking for advice, strategies, support or a diagnosis for instance.

You must also be able to provide evidence to CAMHS about what intervention and support has been offered to the pupil by the school and the impact of this. CAMHS will always ask 'What have you tried?' so be prepared to supply relevant evidence, reports and records.

General considerations

- Have you met with the parent(s)/carer(s) and the referred child/children?
- Has the referral to CMHS been discussed with a parent / carer and the referred pupil?
- Has the pupil given consent for the referral?
- Has a parent / carer given consent for the referral?
- What are the parent/carers' attitudes to the referral?

Basic information

- Is there a child protection plan in place?
- Is the child looked after?
- Name and date of birth of referred child / children.
- Address and telephone number.
- Who has parental responsibility?
- Surnames if different to child's.
- GP details.
- What is the ethnicity of the pupil / family?
- Will an interpreter be needed?
- Are there other agencies involved?

Reason for referral

- What are the specific difficulties that you want CAMHS to address?
- How long has this been a problem and why is the family seeking help now?
- Is the problem situation-specific or more generalised?
- Your understanding of the problem / issues involved.

Further helpful information

- Who else is living at home and details of separated parents if appropriate?
- Name of school.
- Who else has been or is professionally involved and in what capacity?
- Has there been any previous contact with our department?
- Has there been any previous contact with social services?

² Adapted from Surrey and Borders Partnership NHS Foundation Trust

- Details of any known protective factors.
- Any relevant history, i.e. family, life events and / or developmental factors.
- Are there any recent changes in the pupil's or family's life?
- Are there any known risks, to self, to others or to professionals?
- Is there a history of developmental delay, e.g. speech and language delay?
- Are there any symptoms of ADHD / ASD and if so have you talked to the Educational psychologist?

The screening tool on the following page will help to guide whether or not a CAMHS referral is appropriate.

For further support and advice, our primary contacts are:

0116 2952900 – CAMHS Leicester City

INVOLVEMENT WITH CAMHS	
<input type="checkbox"/>	Current CAMHS involvement – END OF SCREEN*
<input type="checkbox"/>	Previous history of CAMHS involvement
<input type="checkbox"/>	Previous history of medication for mental health issues
<input type="checkbox"/>	Any current medication for mental health issues
<input type="checkbox"/>	Developmental issues e.g. ADHD, ASD, LD

DURATION OF DIFFICULTIES	
<input type="checkbox"/>	1-2 weeks
<input type="checkbox"/>	Less than a month
<input type="checkbox"/>	1-3 months
<input type="checkbox"/>	More than 3 months
<input type="checkbox"/>	More than 6 months

* Ask for consent to telephone CAMHS clinic for discussion with clinician involved in young person's care

Tick the appropriate boxes to obtain a score for the young person's mental health needs.

MENTAL HEALTH SYMPTOMS		
<input type="checkbox"/>	1	Panic attacks (overwhelming fear, heart pounding, breathing fast etc.)
<input type="checkbox"/>	1	Mood disturbance (low mood – sad, apathetic; high mood – exaggerated / unrealistic elation)
<input type="checkbox"/>	2	Depressive symptoms (e.g. tearful, irritable, sad)
<input type="checkbox"/>	1	Sleep disturbance (difficulty getting to sleep or staying asleep)
<input type="checkbox"/>	1	Eating issues (change in weight / eating habits, negative body image, purging or binging)
<input type="checkbox"/>	1	Difficulties following traumatic experiences (e.g. flashbacks, powerful memories, avoidance)
<input type="checkbox"/>	2	Psychotic symptoms (hearing and / or appearing to respond to voices, overly suspicious)
<input type="checkbox"/>	2	Delusional thoughts (grandiose thoughts, thinking they are someone else)
<input type="checkbox"/>	1	Hyperactivity (levels of overactivity & impulsivity above what would be expected; in all settings)
<input type="checkbox"/>	2	Obsessive thoughts and/or compulsive behaviours (e.g. hand-washing, cleaning, checking)

Impact of above symptoms on functioning - circle the relevant score and add to the total

<input type="checkbox"/>	Little or none	Score = 0	<input type="checkbox"/>	Some	Score = 1	<input type="checkbox"/>	Moderate	Score = 2	<input type="checkbox"/>	Severe	Score = 3
--------------------------	----------------	-----------	--------------------------	------	-----------	--------------------------	----------	-----------	--------------------------	--------	-----------

HARMING BEHAVIOURS		
<input type="checkbox"/>	1	History of self harm (cutting, burning etc)
<input type="checkbox"/>	1	History of thoughts about suicide
<input type="checkbox"/>	2	History of suicidal attempts (e.g. deep cuts to wrists, overdose, attempting to hang self)
<input type="checkbox"/>	2	Current self harm behaviours
<input type="checkbox"/>	2	Anger outbursts or aggressive behaviour towards children or adults
<input type="checkbox"/>	5	Verbalised suicidal thoughts* (e.g. talking about wanting to kill self / how they might do this)
<input type="checkbox"/>	5	Thoughts of harming others* or actual harming / violent behaviours towards others

* If yes – call CAMHS team to discuss an urgent referral and immediate risk management strategies

Social setting - for these situations you may also need to inform other agencies (e.g. Child Protection)			
<input type="checkbox"/>	Family mental health issues	<input type="checkbox"/>	Physical health issues
<input type="checkbox"/>	History of bereavement/loss/trauma	<input type="checkbox"/>	Identified drug / alcohol use
<input type="checkbox"/>	Problems in family relationships	<input type="checkbox"/>	Living in care
<input type="checkbox"/>	Problems with peer relationships	<input type="checkbox"/>	Involved in criminal activity
<input type="checkbox"/>	Not attending/functioning in school	<input type="checkbox"/>	History of social services involvement
<input type="checkbox"/>	Excluded from school (FTE, permanent)	<input type="checkbox"/>	Current Child Protection concerns

How many social setting boxes have you ticked? Circle the relevant score and add to the total

<input type="checkbox"/>	0 or 1	Score = 0	<input type="checkbox"/>	2 or 3	Score = 1	<input type="checkbox"/>	4 or 5	Score = 2	<input type="checkbox"/>	6 or more	Score = 3
--------------------------	--------	-----------	--------------------------	--------	-----------	--------------------------	--------	-----------	--------------------------	-----------	-----------

Add up all the scores for the young person and enter into Scoring table:

Score 0-4	Score 5-7	Score 8+
Give information/advice to the young person	Seek advice about the young person from CAMHS Primary Mental Health Team	Refer to CAMHS clinic

*** If the young person does not consent to you making a referral, you can speak to the appropriate CAMHS service anonymously for advice. ***
